Instrumental clinical studies on 20 subjects with dry, dehydrated skin for 30 days, conducted at the Dermatological Clinic of the University of Naples Federico II, 14 professional sessions + daily use of 24-hour intensive hydro-plumping cream and evening hyaluronic acid gel for 1 year (total 14 weekly application on plumping hydro-mask). Values calculated based on the percentage of subjects in whom the stated action was observed using specific instrumental techniques and through clinical assessment. All the stated results are statistically significant.
