CICA-CERAMIDES CREAM

CICA = Centella Asiatica (tiger grass) – an Asian herb renowned in Chinese medicine for its healing powers and antiaging properties

Anti-reddening, soothing, repairing and rebalancing cream with chromo-corrective green pigments. Perfect to rebalance irritated and vulnerable skin due to external aggressors, such as intensive cosmetic and dermo-aesthetic treatments (chemical peels, microdermabrasion, laser, tattoos etc) or environmental factors (dryness, cold, wind, sun and pollution). An excellent anti-aging cream for healthy looking skin.

The Active Ingredients:

Centella Asiatica (tiger grass) – With strong repairing and cellular skin protecting (re-epithelization) properties. Tiger grass has always been used for its healing effect. Today many more beneficial properties are known:

- It promotes the growth of fibroblasts
- It increases the production of collagen and fibronectin
- It improves the elasticity and strengthens the barrier function of the skin

For these reasons it is an efficient anti-age ingredient.

Extracts of chestnut, ruscus and calendula: natural source of bioflavonoids, with vasoprotector and anti-reddening properties

Biomimetic Ceramides: rebalances and strengthens the barrier function of the skin, hydrating and relieving the skin

Revivyl: stimulates stem cell skin renewal and protects the skin microbiome

Green chromo-corrective pigments: considerably reduce irritation and redness, making the skin look healthy and radiant
