Diego dalla Palma
PROFESSIONAL

Hello and welcome to this training video for the Diego dalla Palma resurface segment.

We mentioned in the introduction that Diego dalla Palma is a historic Italian brand known for its expertise in the field of skin care. Its long experience has allowed the iconic brand to create a versatile world of beauty recognized for the professionalism and performance of its products in over 58 countries.

Diego dalla Palma offers a wide range of beauty products, designed and laboratory tested for high performance.

RESURFACE²

THE NEW GENERATION OF
PRO-CELL RECONSTRUCTION TREATMENTS

RESURFACE

In this segment we will talk about the RESURFACE range of peeling treatments by Diego dalla Palma.

What is a peeling?

Performed by professionals, CHEMICAL PEELINGS are treatments that act against the most visible skin imperfections due to exfoliating acids that eliminate the upper layer of the skin. There is then a rapid and targeted renewal of the dermis and epidermis.

However, most deep, high-intensity peels carry the risk of damaging the skin barrier, causing damage and inflammatory skin ageing (inflammAging), excessive dryness, cracked skin, redness, irritation and a strong burning sensation and discomfort.

The new generation of RESURFACE pro cell renewal treatments use new active ingredients that eliminate these unwanted effects.

Today, our customers live at a hundred miles an hour. So if the peel required them to take time off after each session, they would not come back as often. For example, they would avoid treatment before a special occasion, holiday, etc., for fear of getting redness, inflammation and so on. Inflammation and so on.

FACIAL RANGE RESURFACE²

Show your clients how to interpret the results!

Take the time to educate them about peeling.

Explain to them that they do not need to see the surface of the skin to get results.

Invite them to always observe and touch their skin to see how much smoother, smoother and brighter it looks after each treatment. after each treatment.

TAKE BEFORE AND AFTER PICTURES TO SHOW THEM THE DIFFERENCE! (especially at the end of the last session)

"CRITERIA FOR CONTRAINDICATIONS"

In which cases these treatments should not be administered.

- Pregnancy / breastfeeding.
- Allergic diathesis.
- Other skin diseases affecting the face such as eczema or psoriasis.
- Autoimmune diseases such as lupus.
- Active infections such as herpes/cold sores.
- Known hypersensitivity to one or more of the active ingredients used.
- Use of retinoids in the previous 4 weeks.
- Avoid prolonged sun exposure for 2 weeks before and after treatment.

FACIAL RANGE RESURFACE²

The new generation of Pro cell renewal treatments.

- No flaking
- No burning sensation
- No redness
- No cracking
- No inflammation
- Skin is instantly softer and more radiant

Featuring a carefully selected blend of concentrated acids and actives,
Like the HA Anti-Irritation System and REVIVYLTM
(Which we'll talk)

They visibly reduce **WRINKLES, ACNE CIRCULARITY** and **IMPERFECTION** and fight against **IRREGULAR TEXTURE**, while respecting the skin's balance.

NEW ACTIVE - REVIVYL™

The first ever holistic renewal accelerator **Revivyl™** is a safe, naturally sourced, multifunctional active ingredient.

By reactivating skin regeneration, **Revivyl™** meets one of the highest consumer expectations:

'I want to look and feel better with younger skin... naturally. At 50, your skin needs 44% more time to renew itself than it did in your 20s.

It is the first cosmetic active dedicated **to accelerate the skin regeneration process** based on *Orobanchae rapum*, a unique plant in Europe without chlorophyll. **Revivyl™** has been scientifically designed to deliver targeted biological actions from the lower to the upper layers of the epidermis.

Evaluated through extensive in vitro, ex vivo and in vivo studies, **Revivyl™** has demonstrated six holistic effects on the skin's natural renewal cycle:

REVIVYL™

On the surface: It protects the **skin's microbiome**, these **good bacteria** are essential for maintaining healthy skin and protecting against external factors.

In-depth: it stimulates skin renewal, while preserving the **activity of stem cells**, the skin's "**youth capital**".

The microbiome stimulates the immune system, breaks down

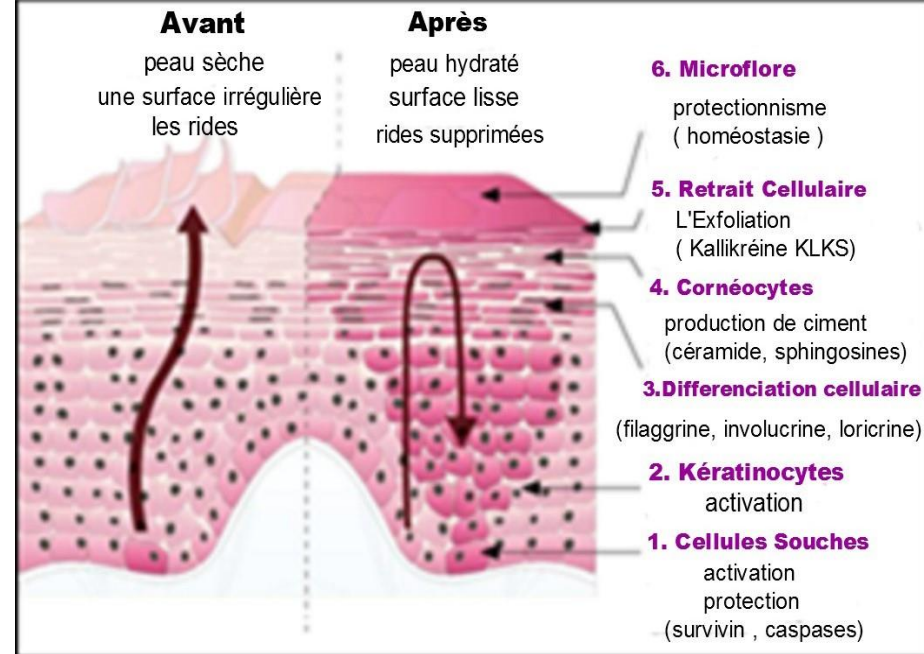

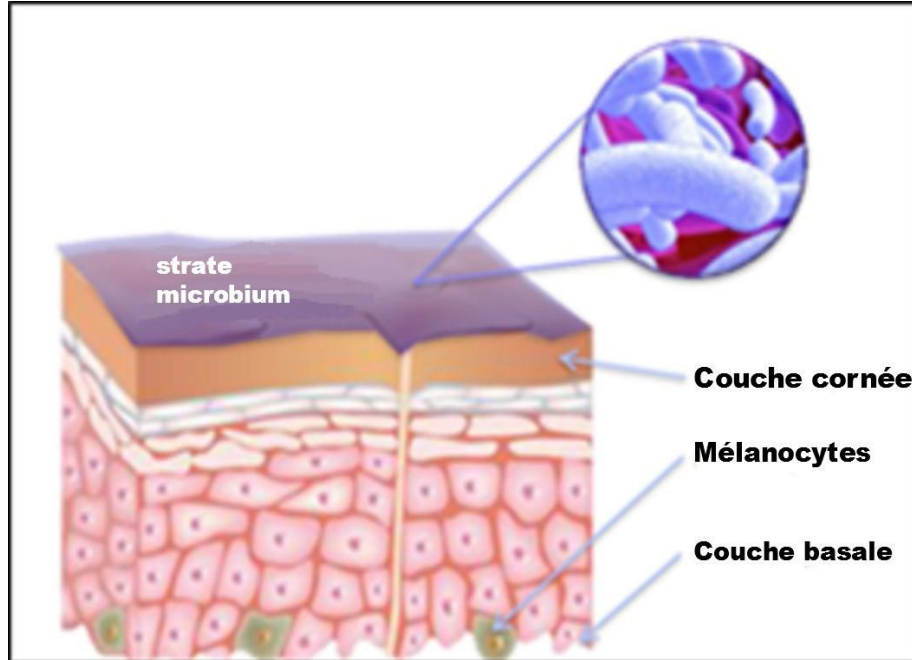

The microbiome stimulates the immune system, breaks down potentially toxic food compounds and synthesizes certain vitamins and amino acids, including B vitamins and vitamin K. For example, the key enzymes needed to form vitamin B12 are found only in bacteria, not in plants and animals.

The microbiome of a healthy person will also provide protection against pathogenic organisms entering the body.

The microbiome is even referred to as a support organ because it plays so many key roles in promoting the proper daily functioning of the human body. Each person has a completely unique microbiota network that is originally determined by their DNA.

The 6 main effects of the skin renewal system:

1. **Protection of epidermal stem cells** Up to + 171% surviving expression.
2. **Reactivation of cell metabolism** Up to + 85% Activation.
3. **Stimulation of new cell growth in the epidermis** Up to +244%.
4. **Reinforcement of the skin barrier** Up to +36% ceramides.
5. **Reactivation of natural exfoliation** Up to +56% exfoliation.
6. **Active protection of the skin microflora** . The skin's microflora is protected, and the skin's surface is smoothed with up to -30% reduction in the number of wrinkles.

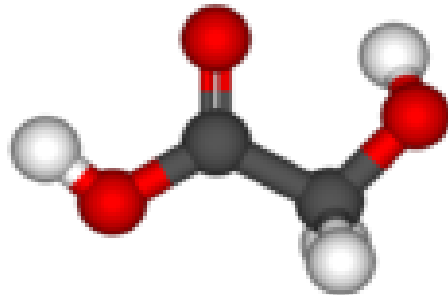

SPECIFIC ACTIVE INGREDIENTS

ACID COMPLEX

Hydroxy acids restructure skin texture, smooth the surface of the epidermis and reduce the appearance of various types of blemishes.

- Due to advanced medical and aesthetic practices, RESURFACE2 combines glycolic acid, mandelic acid and gluconolactone to balance and boost their properties, while respecting the skin's natural well-being and balance.

SPECIFIC ACTIVE INGREDIENTS

ACID COMPLEX

GLYCOLIC ACID

The best-known hydroxy acid to date from sugar cane, beet or grape extract.

Due to its **very small structure**, it can penetrate deep into the skin to **support the cell renewal process**, not only on the surface of the epidermis, but also in the other layers of the skin, where it stimulates **the production of new collagen** to combat the signs of ageing and photoaging (**wrinkles, brown spots, scar tissue, dull and uneven skin tone**).

SPECIFIC ACTIVE INGREDIENTS

ACID COMPLEX

MANDELIC ACID

From bitter almond extract.

Larger structure than glycolic acid.

- Very effective against wrinkles, various types of brown spots, blemishes, acne scars, large pores, impurities and blackheads.
- Milder action on the skin than glycolic acid.

Causes **less redness** and burning sensation. **Often well tolerated by relatively sensitive and hyperpigmented skin.**

Also used in the medical field in the treatment of rosacea and non-cystic inflammatory acne.

SPECIFIC ACTIVE INGREDIENTS

ACID COMPLEX

GLUCONOLACTONE

The most innovative hydroxy acid is also a food additive.

- **Naturally present in the skin** (especially in young people), it helps **regulate the cell renewal process**.
- In cosmetics, it helps to gently and precisely **remove dead skin cells to reduce the appearance of irritation, stinging and itching**.
- This molecule also has **antioxidant properties** that are ideal for fighting ageing.

SPECIFIC ACTIVE INGREDIENTS

HA ANTI-IRRITANT SYSTEM

- **Cell protection system with anti-irritant properties.**

It has been added to the **RESURFACE** exfoliating formulas to improve skin tolerance.

- **It significantly reduces the appearance of side effects** and maintains optimal hydration. In addition, it fights irritation and inflammation **and maintains the skin's water balance.**
- Its main active ingredient is **Betaine**, an amino acid (INCI: Trimethylglycine or glycine betaine), which is often used as an anti-irritant to reduce the dermal sensitisation caused by many active ingredients.

As an anti-irritant, it is often used to reduce the dermal sensitization caused by many active ingredients. Indeed, various studies show that an aqueous solution containing 50% betaine is less irritating than pure water. Its powerful humectant and soothing properties make it an ideal partner for moisturizing and soothing the skin after aggressive exfoliation, such as AHA peels.

SPECIFIC ACTIVE INGREDIENTS

AZELAIC ACID

AZELAIC ACID

It comes from seeds such as barley, wheat and rye.

Ideal for blemishes and acne scars

- Fights the growth of "bad" bacteria associated with acne and blemishes.
- Promotes cell renewal, refines skin texture for even skin tone, reduces acne scars, redness and blemishes and prevents new blackheads from forming.

VITAMIN PP

LA VITAMIN PP

Also known as vitamin B3 or niacinamide, vitamin PP has many benefits for the skin:

- Accelerates new cell growth and healing processes
- Improves the skin's barrier function
- Helps regulate sebum production
- Has anti-inflammatory properties
- Stimulates collagen and elastin production
- Brightens the complexion and fights blemishes, especially on skin with acne scars

SPECIFIC ACTIVE INGREDIENTS

EGF

Epidermal Growth Factor (EGF) naturally present in human skin.

EGF contains 53 amino acids encapsulated in a laboratory-made lysosome.

1. It stimulates the production of new collagen deep within the skin.
2. It strengthens the skin barrier and revitalises the skin for a more youthful appearance.

SPECIFIC ACTIVE INGREDIENTS

MICRO-ENCAPSULATED RETINOL

Pure microencapsulated RETINOL is one of the **main cosmetic allies** used to prevent the formation of wrinkles, regulate sebum, reduce the appearance of various types of imperfections and restructure the skin texture.

The specific encapsulation process **uses carnauba wax to preserve its properties for a smoother and better tolerated action on the skin.**

The carnauba wax also contributes to the penetration and total absorption of retinol, without negative side effects.

Resurface

Retail Home Care

AHA REGENERATING EXFOLIATING TONIC 5%.

200 ml IDEAL FOR PREPARING 1 WEEK BEFORE CURE

Illuminating lotion that stimulates cell renewal. Gently eliminates dead and dull cells. The complexion is revived and evened out. The skin is smoother and more even.

Contains a 5% acid combination with a pH of 3.5

ACTIVE INGREDIENTS: Revivyl [™] , glycolic acid , gluconolactone , HA anti-irritant.

RESURFACE² CICA-CREAM

Diego dalla Palma
PROFESSIONAL

CICA-CERAMIDE CREAM

50 ml

Perfect cream to rebalance irritated and vulnerable skin. An excellent anti-ageing cream for healthy looking skin. It is moisturizing, protective, anti-redness and vaso-protective, soothing, restorative. with corrective green pigment.

Professional Treatments

AHA PREPARATORY EXFOLIATING LOTION 5

300 ml pump bottle

With purifying and keratolytic/exfoliating properties for gentle action, it facilitates the removal of residues, impurities and sebum and prepares the skin for exfoliating treatments.

Contains a 5% acid combination with a pH of 3.5

ACTIVE INGREDIENTS : Revivyl™ , glycolic acid , gluconolactone , HA anti irritant.

ULTRA REGENERATING SCRUB POWDER FRESH UP CARE

50g jar

A blend of herbs and algae with keratolytic/exfoliating and regenerating properties. Use only after mixing with Exfoliating Activator. **ACTIVE INGREDIENTS:** White willow, a natural source of salicin (precursor of salicylic acid) with exfoliating and purifying properties, meadowsweet, rich in salicylates and vitamin C, unifies the complexion and smoothes the skin, spirulina, a detoxifying, sebum-regulating and anti-ageing seaweed, purifying and decongesting plantain, soothing and moisturising lime blossom, softening and astringent pulmonaria officinalis, sebum-regulating and purifying horsetail.

AHA EXFOLIATING ACTIVATOR 15% (IN FRENCH) SOIN FRESH UP

Bottle 200 ml

Activating emulsion combined with ultra regenerating powder scrub. Enriched with a blend of exfoliating acids that boost renewal and regeneration properties. Contains a 15% acid combination with a pH of 3.2-3.5

ACTIVE INGREDIENTS : Revivyl™ , glycolic acid , gluconolactone , HA anti-irritant

COMBINED ACIDS CONCENTRATE 20% ANTI BLEMISHES

Dropper bottle 110 ml

Exfoliating concentrate specifically designed to combat skin discolouration, the after-effects of juvenile acne, acne scars and uneven skin texture. Contains a 20% acid combination with a pH of 3.0

ACTIVE INGREDIENTS: Revivyl™, glycolic acid, gluconolactone, azelaic acid, HA anti-irritant system (betaine).

40% ANTI-BLEMISH COMBINED ACID CONCENTRATE

Dropper bottle 110 ml

Exfoliating concentrate specifically designed to combat skin discolouration, the after-effects of juvenile acne, acne scars and uneven skin texture. Contains a 40% acid combination with a pH of 3.0

ACTIVE INGREDIENTS: Revivyl™, glycolic acid, gluconolactone, azelaic acid, HA anti-irritant system (betaine).

NEUTRALIZING LOTION

200 ml bottle

Neutralizes the active ingredient contained in acid-based exfoliants to control their action.

ACTIVE INGREDIENTS: HA anti-irritant

Resurface

Professional Treatments

20% ANTI-AGEING COMBINED ACID CONCENTRATE

Dropper bottle 110 ml

Exfoliating concentrate specially designed to fight against wrinkles and visible signs of skin ageing. Contains a 20% acid combination with a pH of 3.0

ACTIVE INGREDIENTS : Revivyl™ , glycolic acid , gluconolactone , ***anti-oxidant anti-aging*** ferulic acid, HA anti-irritant system (betaine).

40% ANTI-AGEING COMBINED ACID CONCENTRATE

Dropper bottle 110 ml

Exfoliating concentrate specially designed to fight against wrinkles and visible signs of skin ageing. Contains a 40% acid combination with a pH of 3.0

ACTIVE INGREDIENTS : Revivyl™ , glycolic acid , gluconolactone , anti-oxidant anti-aging ferulic acid, HA anti-irritant system (betaine).

INTENSIVE ANTI-AGING AND ANTI-BLEMISH SERUM

Dropper bottle 30 ml

Soothing and plumping concentrate that soothes redness, itching and tightness, while relieving irritated skin from exfoliants.

ACTIVE INGREDIENTS: Beta-glucan relieves and soothes, bioflavonoids vasoprotects against redness, heptapeptide-10 soothes and calms, epigallocatechin stimulates microcirculation reduces redness, panthenol provitamin B5 hydrates and regenerates.

MASQUE APAISANT RÉÉQUILIBRANT

250 ml jar

Balances irritated skin and skin pH after a shock treatment with exfoliating acid. Soothes redness and relieves feelings of itching and discomfort.

ACTIVE INGREDIENTS: Revivyl TM , zinc oxide acts against redness and rebalances the pH, glycyrrhizic acid calms and soothes, panthenol provitamin B5 moisturises and regenerates.

EGF ANTI-AGEING RENEWAL SERUM

10 single-use bottles

New generation anti-ageing concentrate that stimulates cell renewal and collagen production to reduce the depth of wrinkles. For firmer, more supple, more radiant skin.

ACTIVE INGREDIENTS :Revivyl [™], EGF growth factor , hyaluronic acid , N acetylglucosamine , threalose.

ANTI-BLEMISH BALANCING SERUM

10 single-use bottles

Purifying and unifying concentrate ideal for combating blemishes caused by acne and impurities and in the treatment of scars and blemishes. The skin is smoother and more uniform, the texture is refined.

ACTIVE INGREDIENTS: Revivyl [™] , azelaic acid + vitamin PP.

ANTI-AGING AND ANTI-BLEMISH RETINOL REGENERATING SERUM

10 single-use bottles

Microencapsulated pure retinol concentrate with powerful anti-ageing and anti-imperfection properties. Specially designed to fight wrinkles, dark spots, uneven skin tone, acne scars and large pores. The skin's texture is refined and the complexion is visibly younger and more radiant.
