The Science, The Philosophy

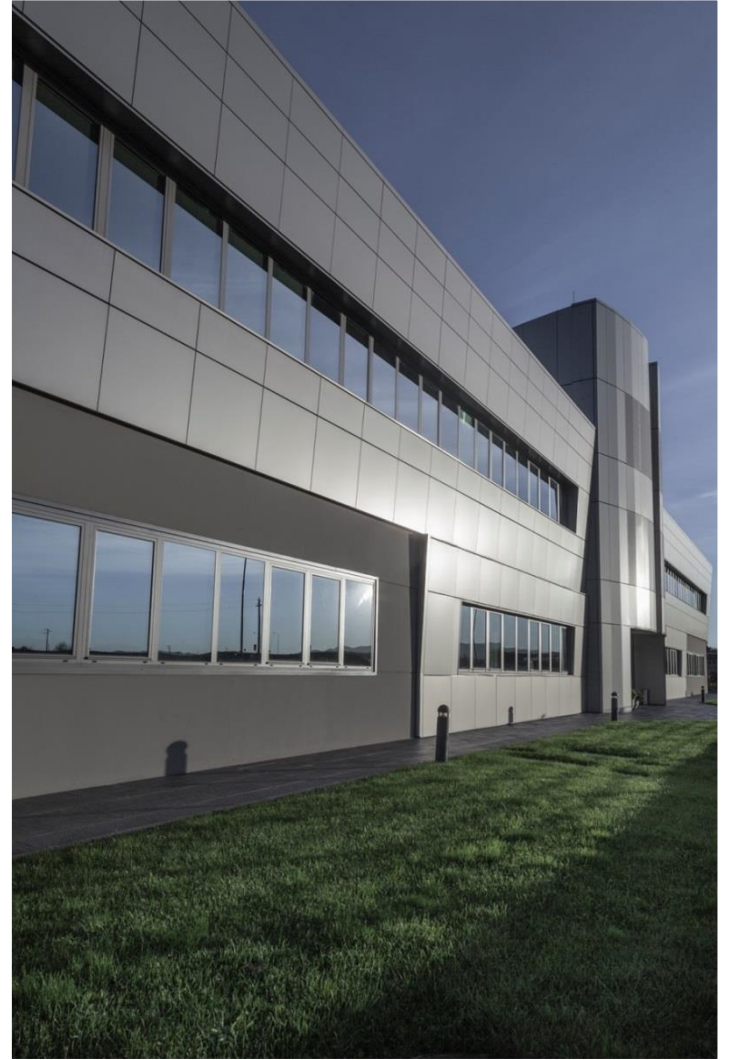

PROFESSIONAL EXPERTISE

Where science
meets beauty

The RVB LAB research laboratory was created more than **60 years ago**. It is the result of a **collaboration between doctors in cosmetic science** who have created a high-level dermocosmetic line, composed of **pure pharmaceutical grade ingredients**, always at the cutting edge of research.

It is in this innovative environment, that the Diego dalla Palma Professional line has been created, **where science meets Italian beauty and luxury**. It is a creative line in the level of development of new products using **active ingredients** that will become pillars of the cosmetic field. We can therefore say that they are the **creators of cosmetics of the future**.

What differentiates a **DERMOCOSMETIC LINE** from a traditional cosmetic line?

Dermocosmetics refers to a medical grade line. These lines must be designed and formulated to restore the health of the skin. This requires months to years of testing. To qualify as a dermocosmetic, the line must respect the following rules:

- 1-Must provide a deep action for maximum absorption
- 2-Must contain active ingredients that have undergone rigorous clinical laboratory testing in relation to their efficacy towards a specific skin problem.
- 3-Must meet **very high pharmaceutical production standards**. Again, products must be designed with pharmaceutical grade actives that have been proven to be effective and safe.
- 4-The production process of medical grade products must be done in a laboratory that has obtained their **ISO certification**. The laboratory is therefore under strict rules that **guarantee quality, efficiency and safety**.

RVB SKINLAB

OUR STRENGTHS

- Over 60 years of professional expertise.** Always looking for the best.
- Sold in 54 countries.** Products are designed for all climates.
- Dermocosmetic science** with targeted **corrective** solutions (medical grade)
- Deep action to restore the skin's health.** Treating the root cause for long-term results
- Clean cosmetics** developed with sustainable formulations.
Not tested on animals. Purest ingredients available.
- Results proven** by rigorous efficacy tests
- Tests carried out under dermatological control** to ensure the safety of the products for all skin types
- Made in Italy** following the **strict European standards** that guarantee above all the safety of the products.

EFFICIENCY TESTS

The best research in the field of
of skin care.
For a safe approach.

Tests performed with the latest technology and equipment. The tests are carried out in certified laboratories, totally **independent from RVB LAB**. Results are not based on the patients' statement, however, their feedback are carefully considered during the evaluation.

The following methods are used for the evaluation:

- In vitro cultures (cell cultures) and in vivo tests
- The following instrumental tests: hydration measurement, water loss measurement, sebum level measurement sebum level, skin radiance, skin elasticity, decrease of wrinkles, dermal density (by ultrasound), evaluation by confocal microscope (high resolution by biopsy), evaluation of the microcirculation by Doppler
- Results reported by dermatologists

*All active ingredients and materials are inspected before going into production and everything is re-tested at the end of production to ensure the best possible quality of the products.

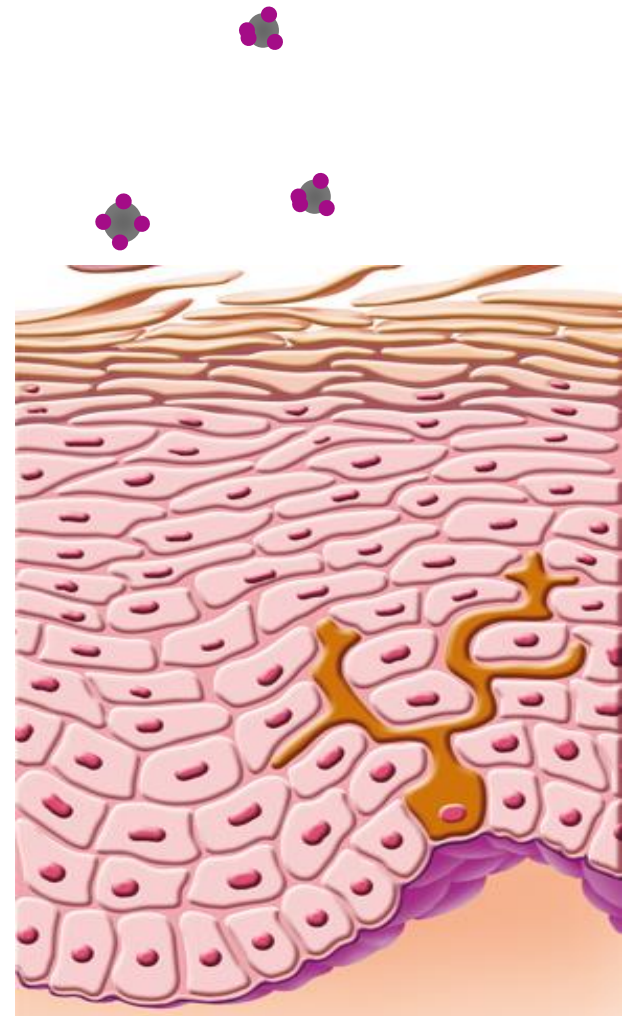

The Carriers

A key component for product performance and targeted results.

All active ingredients have a role to play at various **levels of the skin**. It is therefore essential that it is delivered in the right way to produce the desired action or behavior. They must contain the right concentration of active ingredients to be delivered at the right place in the layers of the skin.

To optimize the **penetration of the active ingredients**, the Diego dalla Palma formulas include:

- Liquid crystal formulas (biomimetics)
- liposomes
- nanospheres
- glycosaminoglycans

SAFETY ABOVE ALL

Our products are tested under **dermatological control**. The tests are carried out by **independent laboratories** in the best Italian universities to guarantee the safety and effectiveness of the products.

Each product has been studied and evaluated so that it is safe to use after any surgical procedure or aggressive treatment such as fractional laser etc.

The tests are performed on human volunteers.

We do not conduct any tests on animals.

We will never do that. This is a fundamental principle.

ECO-FRIENDLY PRODUCTION

Pure and clean ingredients for healthy cells

Free of parabens, alcohol, silicone, mineral oil, propylene glycol, synthetic dyes, and any ingredients that may cause endocrine disruption or irritation. No ingredients of animal derivation.

- Since 2013, the laboratory has been part of the global Responsible Care program, a group of industries involved in sustainable development
- In 2017, the company received its EcoCert Cosmos certification (production standard for natural and organic cosmetics)
- Production plant using solar energy and water recycling
- FSC-certified packaging to avoid deforestation

The Methodology

TARGETED ACTION FOR THE CORE OF THE SKIN

Restore cellular communication and harmony

Wrinkles, dehydration, sensitivity, and excessive sebum production are all external signs due to an **internal imbalance** at the biological level. There is a problem of harmony between the cells.

Our goal is **BIO-REVITALIZATION**. We want to rebalance the cellular communication network for a healthy skin, glowing with health!

Diego dalla Palma products provide the skin with the daily supply of nutritional supplements.

The skin needs to maintain its health to ensure its defense and repair functions, both on the surface and in depth, for immediate and long-lasting results.

THE METHODOLOGY

- 1 Detoxify cells and regulate their metabolism**
Combination of active ingredients: Cell-Detoxium
- 2 Stimulate cellular activity and bio-revitalization**
Combination of active ingredients: Revivyl,
Royalactine Epi-Peptide, 51+3 Hyalu
- 3 Balancing cellular communication**
Combination of active ingredients: 51+3 Hyalu complex

SPECIFIC ACTIONS

Targeted treatments for all skin conditions

The Diego dalla Palma range offers treatments and products for all skin problems. As we have seen previously, we can target and **rebalance** the **cellular communication** that is often the issue when skin imperfections and problems occur. Our **super-concentrated active ingredient recipes** contain **bio-mimetic* peptides*** that bring changes to the skin from the **inside out**.

*Bio-mimetic ingredient: works at the cellular level. Perfectly imitates one or more specific mechanism(s) of the cells. Is quickly recognized by the metabolism and therefore provides rapid results.

51+3 HYALU COMPLEX

The daily nutritional supplement for the skin.

51+3 HYALU COMPLEX™ provides everything the cells and structural components of the skin need to be healthy. **It provides the perfect level of nutrients that are necessary for proper cell communication and fights skin problems on the surface and deep down.** For immediate and lasting results.

For each segment of the brand, the **51+3 HYALU COMPLEX™** is rebalanced according to the skin imbalance to correct.

Let's see what this combination of actives are made of.

51+3 HYALU COMPLEX

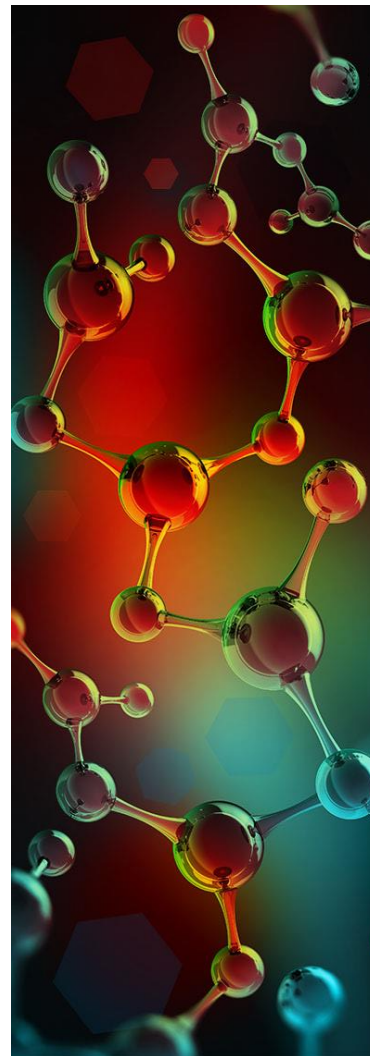

20	AMINO ACIDS
16	VITAMINES
6	TRACE ELEMENTS AND MINERALS
3	NUCLEIC ACID
4	CERAMIDES
2	CELLULAR OSMO-PROTECTORS
3	HYALURONIC ACIDS

51+3 HYALU COMPLEX

20 AMINO ACIDS

Alanine, arginine, aspartic acid, glutamic acid, cysteine, glycine, histidine, isoleucine, leucine, lysine, phenylalanine, methionine, proline, serine, taurine, threonine, tyrosine, trimethylglycine, tryptophane, valine

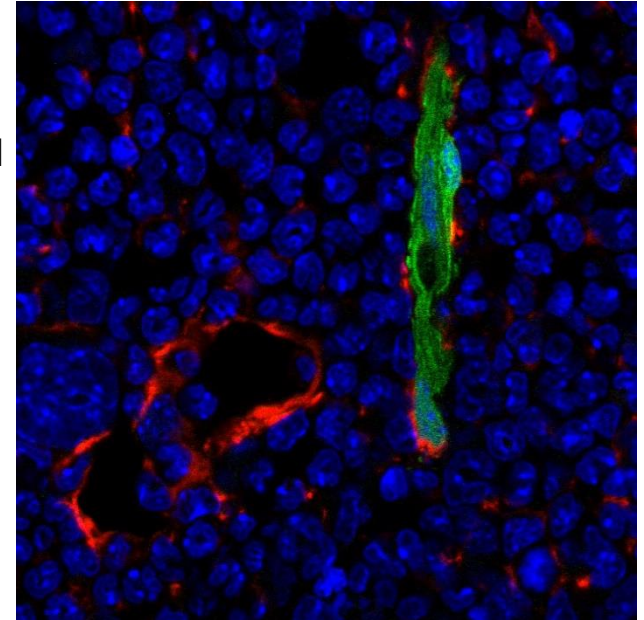

Function: *Essential for the neoformation and resistance of the structural elements of the skin, such as collagen, elastin and keratin.*

51+3 HYALU COMPLEX

16 VITAMINS

Linoleic acid and linolenic acid (two forms of vitamin F), ascorbic acid (vitamin C), folic acid pantothenic acid (vitamin B5), alpha-lipoic acid (acid or vitamin tiotic N), biotin (vitamin B8), Cianocobalamin (vitamin B12), inositol (vitamin B7), Niacinamide (nicotinamide or vitamin B3 or vitamin PP), pyridoxine (vitamin B6), retinol (vitamin A), riboflavin (vitamin B2), thiamine (vitamin B1), Tocopherol (vitamin E), Ubiquinone (vitamin Q).

Function: *Stimulate the metabolic functions of the cells and protect the skin against external aggressions*

51+3 HYALU COMPLEX

6 TRACE ELEMENTS AND MINERALS

Iron, magnesium, copper, silicon, sodium, zinc.

Function: *Ionic balance of the skin, essential for cellular communication and metabolism*

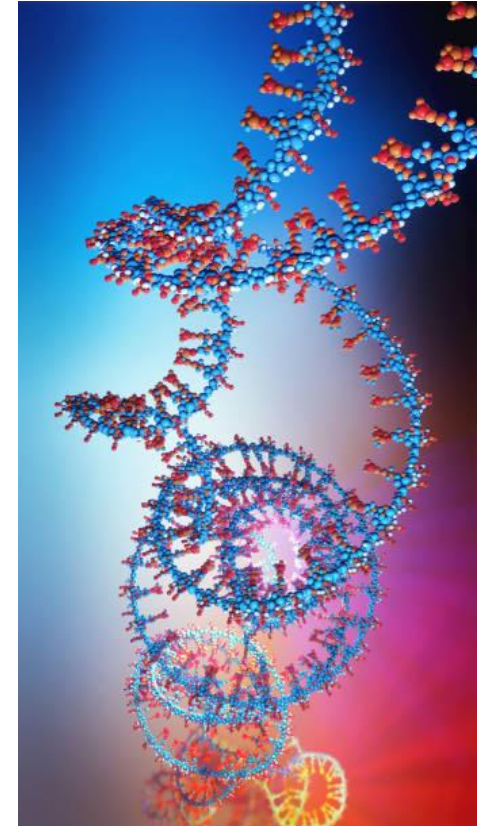

3 NUCLEIC ACIDS

DNA

RNA(ribonucleic acid)

ATP(adenosine triphosphate)

Function: *Regulates metabolism, energy production, cell growth and vitality.*

51+3 HYALU COMPLEX

4 CERAMIDES

Ceramide 1, Ceramide 3, Ceramide 6 II, Phytosphingosine precursor of ceramide.

Function: *Form the intercellular cement of the skin, essential for its protective function*

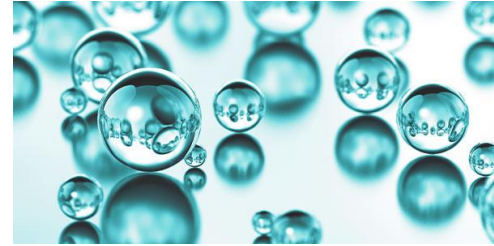

2 CELLULAR OSMO-PROTECTORS

Trehalose, Betaine.

Function: *Regulate the correct osmotic pressure, which is the precise water content in the cells. Is essential to fight against cellular stress*

51+3 HYALU COMPLEX

3 HYALURONIC ACIDS

Hyaluronic acid with high molecular weight.

Function: *Regulates optimal long-term skin hydration, smoothes fine lines and enhances the penetration of other active ingredients.*

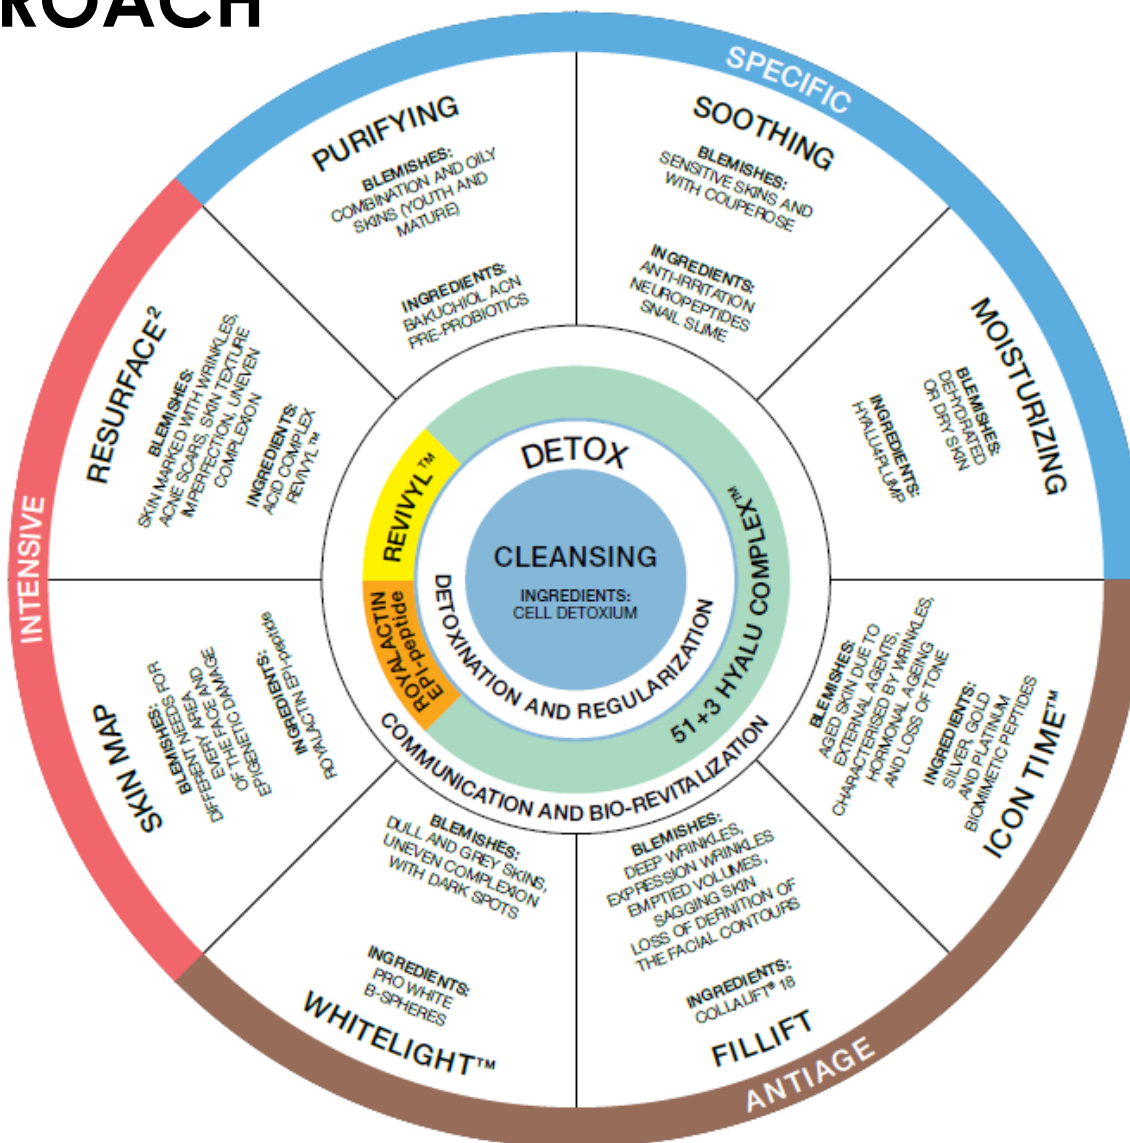

Hyaluronic acid with low molecular weight.

Function: *Promotes the deepest hydration of the epidermis and stimulates the physiological production of proteins essential to the skin's firmness and elasticity.*

Glycosaminoglycans.

Function: *Stimulate the neo-formation of hyaluronic acid and strengthen the blood microcirculation. Because they are so small, they not only penetrate easily, but also make the skin more permeable to other active ingredients that stimulate their absorption.*
